Comments

The samples were examined for the presence of Cyanobacteria at x400 magnification.

200ml of the sample was then filtered to concentrate the algal cells and then examined at x200 and x400 magnification.

One species of Cyanocateria (Oscillatoria sp.) was found in the sample, at very low levels.

The World Health Organisation (WHO Rating) above indicates levels of algae present in the sample(s), against WHO guidance values.

The testing results in this certificate relate only to the samples described above. Unless otherwise stated, all results are expressed on an as received basis. All analysis was carried out in UKAS accredited laboratory.
